allan.casilum

I'm a Web / PHP Developer since 2006, and up to know im loving this job, learning new technology and proud that my work are being used to help people business promote their existence or their business operation. Learning new PHP framework or software like WordPress, also JS framework and templating framework.

### HIGHEST EDUCATION

#### **Bachelor of Science in Computer Science**

**University of Mindanao**

**MAY 1999 - March 2003**

### EXPERIENCE

#### **2013 - 2014 Senior PHP / IT Developer InfiniSYS**

- Work on Web portal like CRM, we use PHP framework Laravel, and Bootstrap for templating, MySQL DB for storage and JQuery for JS functions.

Created portal for BOQ ( Bank of Queensland ) Australia, Property Management System. Involve also in Deppro programming patch and fix, also created API to push data to IOS and IOS APP to push data to Web portal.

- BOQ, bank of queensland
  - a portal with login and multi user with client and admin role
  - its a activity tracker with results
  - with calendar and report, using fullcalendar jquery plugin
- PMS a web portal for property management system
  - Jobs for booking and inspecting, with property add and report
  - use different jquery plugin like fullcalendar and datagrid

#### **2010 - 2013 Senior PHP / IT Developer SipepDesign**

- Work with various WordPress as CMS customize them according to client needs, used different strategy like WP API / Hooks / Plugins and custom post from simple to complex site such as using AJAX base design.

#### **2006 - 2010 UBERWEBS**

Lead Programmer, develop websites using Php / Mysql with AJAX technique, currently developing CMS. The Main Modules are Webpage, Filemanager and User Administration.

**2004 - 2005 City Government of Davao (July 2004 – December 2005 Contract for one year )  
(CITC – City Information Technology Center)**

Developed a desktop application system, for Real property Tax we used Vb.net as a front end and MsSql2000 as a database.

**TECHNICAL SKILLS**

**PHP - Laravel, Codeigniter Framework, MVC, OOP, Design Pattern**

**Web Base Software - WordPress, Cpanel, WHM, Vtiger CRM**

**Front End - HTML, CSS ( bootstrap framework ), JS ( JQuery, OOP ), AJAX**

**Database : MySQL**

**OS : Windows , Linux ( Ubuntu )**

**Other : SVN, GIT**

**PORTFOLIO**

**Note: Content and Images and design are not from me nor I work on it, I am not a designer and I do programming only both front and backend only, so I don't have Adobe Photoshop installed nor dreamweaver, I use Ubuntu as my OS and Gimp as my code editor.**

<http://brazilianweightloss.net/> ( main website, hired as contractor )

( 3 website that I integrate also and change and alter template <http://powercafeshop.com/> ,

<http://brazilianreshapers.com/> , <http://powerjuiceshop.com/> )

- use WordPress
- Its a ecommerce using wp-ecommerce plugin, setup the theme and shop
- featured product in front page
- rotating slideshow in front page
- I integrate their template from their designer and turn it CMS and shop for them, as much as possible data are added or alter in backend
- created a template settings

<http://tianavonjohnson.com/> ( hired as contractor )

( another website that is same concept and same owner <http://njsignaturehair.com/> )

- use WordPress
- I integrate their template from their designer and turn it CMS and shop for them, as much as possible data are added or alter in backend
- created a template settings
- frontpage slideshow that will respond in mouse hover in thumb and big image changes
- use custom post type on various content
- slideshow and rotating banner
- event plugin

<http://andreavalentini.com/> ( hired as contractor )

- created a e-commerce for this website, I was the one who integrate their mockup and built it to use wordpress as ecommerce.

the features are:

- drag and drop cart
- product carousel on the single product page

- color switch variation, when you select any color for the said item, it will change and return the right image for that color
- integrate wish-list plugin
- create some custom post type for other pages
- plugin use: wp-e-commerce / next-gen gallery ( for the slideshow on front page ), I extend the wpcommerce heavily for this one to meet the client need.
- html / css and images are already given to me.

<http://www.baystateenvelope.com/> ( hired as contractor )

- use WordPress as CMS
- a envelop product or showcase
- created lot of custom post on other content
- the inner pages are ajax as client demand
- html / css and images are already given to me.

<http://garrisonbespoke.com/> ( hired as contractor )

- create a simple website mostly to display their product, nothing special mostly image gallery effects only
- use next-gen gallery as a plugin
- html / css and images are already given to me.

<http://www.umindanao.edu.ph/> ( hired as contractor )

- use WP as CMS
- convert their design to make it fully functional CMS

### **Here are my works from Other Clients**

<http://homebodyphoto.com/>

- use WP as CMS
- create custom photo gallery
- extend the image uploader API

<http://sokastudio.com/>

- use WP as cms, ajax base website, and jquery carousel

<http://sarahglovskyrealtor.com/>

- use WP as CMS
- integrate MLS/IDX design

<http://onguardprotector.com/>

- use WP as CMS
- use wp-ecommerce as plugin
- create custom post type
- handles video post
